

To all customers of Nölle Kunststofftechnik GmbH

Meschede, 26.09.2022

### **Application of an energy cost surcharge**

Dear business partners,

We would like to thank you for the trust you have placed in us and our products and for the good cooperation.

We all thought that the hardest part would be over by the beginning of 2022 and that we would be able to return to normal conditions.

However, due to geopolitical events, we are experienced an increase in energy costs this year, which brings us further challenges that require a joint effort of suppliers and customers to share the impact of the cost increase.

Therefore, we have decided to introduce a 10% energy cost surcharge from 01 October 2022 to compensate for the increased energy costs. The decision was not easy for us. However, in our view this is a necessary step to make sure we can continue to keep up our good business relationship with the associated quality of products and service.

We are closely monitoring the situation on the procurement and energy markets and plan to review this decision as soon as market conditions allow.

We also remain committed to being a reliable supplier.

We thank you for your support in assuring a sustainable business relationship.

If you have any questions regarding quotations or your current orders, please do not hesitate to contact your contacts at our company.

Yours sincerely

Nölle Kunststofftechnik GmbH
